Point-of-Sale Devices: Serial Number, Jack Number and Physical Location

Serial Number:
- **Verifone VX520**: See photo below. Serial number is located on the back of the device at the top. Format is NNN-NNN-NNN.
- **Ingenico iWL250G**: See photo below. Serial number is located on the back of the device under the battery. Format is NNNNNWLNNNNNNNN.
- **Other devices**: If you do not know where the serial number is located, we suggest checking the device manual.

Jack number: Should be on the wall plate into which the communication line (i.e. phone line) for the device is plugged.

Physical location: In addition to the address and building where the device is located, this should include a room number. If there is no room number, a description that would allow someone to locate the device should be included, for example “basement lobby.”
