INDEPENDENT AUDITORS’ REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED IN ACCORDANCE WITH GOVERNMENT AUDITING STANDARDS

Members of the Board
Oregon State University
Corvallis, Oregon

We have audited, in accordance with the auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in Government Auditing Standards issued by the Comptroller General of the United States, the financial statements of the business-type activities and the aggregate discretely presented component units of Oregon State University (University), a component unit of the State of Oregon, as of and for the years ended June 30, 2016 and 2015, and the related notes to the financial statements, which collectively comprise the University’s basic financial statements, and have issued our report thereon dated October 31, 2016. Our report includes a reference to other auditors who audited the financial statements of the Oregon State University Foundation and the Agricultural Research Foundation, which comprise the aggregate discretely presented component units, as described in our report on the University’s financial statements. This report does not include the results of the other auditors’ testing of internal control over financial reporting or compliance and other matters that are reported on separately by those auditors. The financial statements of the aggregate discretely presented component units were not audited in accordance with Government Auditing Standards.

Internal Control over Financial Reporting

In planning and performing our audit of the financial statements, we considered the University’s internal control over financial reporting (internal control) to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinions on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the University’s internal control. Accordingly, we do not express an opinion on the effectiveness of the University’s internal control.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A material weakness is a deficiency, or a combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the University’s financial statements will not be prevented, or detected and corrected on a timely basis. A significant deficiency is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.
Compliance and Other Matters
As part of obtaining reasonable assurance about whether the University's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under Government Auditing Standards.

Purpose of this Report
The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the result of that testing, and not to provide an opinion on the effectiveness of the University’s internal control or on compliance. This report is an integral part of an audit performed in accordance with Government Auditing Standards in considering the University’s internal control and compliance. Accordingly, this communication is not suitable for any other purpose.

INDEPENDENT AUDITORS’ REPORT ON COMPLIANCE FOR EACH MAJOR FEDERAL PROGRAM, REPORT ON INTERNAL CONTROL OVER COMPLIANCE, AND REPORT ON THE SCHEDULE OF EXPENDITURES OF FEDERAL AWARDS REQUIRED BY THE UNIFORM GUIDANCE

Members of the Board
Oregon State University
Corvallis, Oregon

Report on Compliance for Each Major Federal Program
We have audited Oregon State University’s (the University) compliance with the types of compliance requirements described in the OMB Compliance Supplement that could have a direct and material effect on the University’s major federal program for the year ended June 30, 2016. The University’s major federal program is identified in the summary of auditors’ results section of the accompanying schedule of findings and questioned costs.

Management’s Responsibility
Management is responsible for compliance with federal statutes, regulations, and the terms and conditions of its federal awards applicable to its federal programs.

Auditors’ Responsibility
Our responsibility is to express an opinion on compliance for each of the University’s major federal programs based on our audit of the types of compliance requirements referred to above. We conducted our audit of compliance in accordance with auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in Government Auditing Standards, issued by the Comptroller General of the United States; and the audit requirements of Title 2 U.S. Code of Federal Regulations Part 200, Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards (Uniform Guidance). Those standards and the Uniform Guidance require that we plan and perform the audit to obtain reasonable assurance about whether noncompliance with the types of compliance requirements referred to above that could have a direct and material effect on a major federal program occurred. An audit includes examining, on a test basis, evidence about the University’s compliance with those requirements and performing such other procedures as we considered necessary in the circumstances.

We believe that our audit provides a reasonable basis for our opinion on compliance for each major federal program. However, our audit does not provide a legal determination of the University’s compliance.

Opinion on Each Major Federal Program
In our opinion, Oregon State University complied, in all material respects, with the types of compliance requirements referred to above that could have a direct and material effect on its major federal program for the year ended June 30, 2016.
Other Matters
The results of our auditing procedures disclosed instances of noncompliance, which are required to be reported in accordance with the Uniform Guidance and which are described in the accompanying schedule of findings and questioned costs as items 2016-001 and 2016-002. Our opinion on each major federal program is not modified with respect to these matters.

The University’s responses to the noncompliance findings identified in our audit are described in the accompanying Schedule of Findings and Questioned Costs. The University’s response was not subjected to the auditing procedures applied in the audit of compliance and, accordingly, we express no opinion on the responses.

Report on Internal Control over Compliance
Management of the University is responsible for establishing and maintaining effective internal control over compliance with the types of compliance requirements referred to above. In planning and performing our audit of compliance, we considered the University’s internal control over compliance with the types of requirements that could have a direct and material effect on each major federal program to determine the auditing procedures that are appropriate in the circumstances for the purpose of expressing an opinion on compliance for each major federal program and to test and report on internal control over compliance in accordance with the Uniform Guidance, but not for the purpose of expressing an opinion on the effectiveness of internal control over compliance. Accordingly, we do not express an opinion on the effectiveness of the University’s internal control over compliance.

A deficiency in internal control over compliance exists when the design or operation of a control over compliance does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, noncompliance with a type of compliance requirement of a federal program on a timely basis. A material weakness in internal control over compliance is a deficiency, or combination of deficiencies, in internal control over compliance, such that there is a reasonable possibility that material noncompliance with a type of compliance requirement of a federal program will not be prevented, or detected and corrected, on a timely basis. A significant deficiency in internal control over compliance is a deficiency, or a combination of deficiencies, in internal control over compliance with a type of compliance requirement of a federal program that is less severe than a material weakness in internal control over compliance, yet important enough to merit attention by those charged with governance.

Our consideration of internal control over compliance was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control over compliance that might be material weaknesses or significant deficiencies and therefore, material weaknesses or significant deficiencies may exist that were not identified. We did not identify any deficiencies in internal control over compliance that we consider to be material weaknesses. However, we identified certain deficiencies in internal control over compliance, as described in the accompanying schedule of findings and questioned costs as items 2016-001 and 2016-002, which we consider to be significant deficiencies.

The University’s responses to the internal control over compliance findings identified in our audit are described in the accompanying Schedule of Findings and Questioned Costs. The University’s responses were not subjected to the auditing procedures applied in the audit of compliance and, accordingly, we express no opinion on the responses.
The purpose of this report on internal control over compliance is solely to describe the scope of our testing of internal control over compliance and the results of that testing based on the requirements of the Uniform Guidance. Accordingly, this report is not suitable for any other purpose.

Report on Schedule of Expenditures of Federal Awards Required by the Uniform Guidance
We have audited the financial statements of the business-type activities and the aggregate discretely presented component units of the University as of and for the year ended June 30, 2016, and the related notes to the financial statements, which collectively comprise the University’s basic financial statements. We issued our report thereon dated October 31, 2016, which contained unmodified opinions on those financial statements. Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the basic financial statements. The accompanying schedule of expenditures of federal awards is presented for purposes of additional analysis as required by the Uniform Guidance and is not a required part of the basic financial statements. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the basic financial statements. The information has been subjected to the auditing procedures applied in the audit of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the schedule of expenditures of federal awards is fairly stated in all material respects in relation to the basic financial statements as a whole.

NOTE 1  BASIS OF PRESENTATION

The accompanying schedule of expenditures of federal awards (the "Schedule") includes the federal award activity of Oregon State University under programs of the federal government of the year ended June 30, 2016. The information in this Schedule is presented in accordance with the requirements of Title 2 U.S. Code of Federal Regulations Part 200, Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards (Uniform Guidance). Because the Schedule presents only a selected portion of the operations of Oregon State University, it is not intended to and does not present the financial position, changes in net position, or cash flows of Oregon State University.

NOTE 2  SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Expenditures reported on the Schedule are reported on the accrual basis of accounting. Such expenditures are recognized following the cost principles contained in the Uniform Guidance, wherein certain types of expenditures are not allowable or are limited as to reimbursement. Negative amounts shown on the Schedule, if any, represent adjustments or credits made in the normal course of business to amounts reported as expenditures in prior years. Oregon State University has elected not to use the 10-percent de minimis indirect cost rate allowed under the Uniform Guidance.

NOTE 3  FEDERAL STUDENT LOAN PROGRAMS

The federal student loan programs listed subsequently are administered directly by Oregon State University, and balances and transactions relating to these programs are included in Oregon State University's basic financial statements. Loans outstanding at the beginning of the year and loans made during the year are included in the federal expenditures presented in the Schedule. The balance of loans outstanding at June 30, 2016 consists of:

Section I – Summary of Auditors’ Results

Financial Statements

1. Type of auditors’ report issued: Unmodified

2. Internal control over financial reporting:
   • Material weakness(es) identified?  □ yes  ☒ no
   • Significant deficiency(ies) identified? □ yes  ☒ none reported

3. Noncompliance material to financial statements noted? □ yes  ☒ no

Federal Awards

1. Internal control over major federal programs:
   • Material weakness(es) identified?  □ yes  ☒ no
   • Significant deficiency(ies) identified? □ yes  ☒ none reported

2. Type of auditors’ report issued on Compliance for major federal programs: Unmodified

3. Any audit findings disclosed that are required to be reported in accordance with 2 CFR 200.516(a)? ☒ yes  □ no

Dollar threshold used to distinguish between Type A and Type B programs: $3,000,000

Auditee qualified as low-risk auditee? □ yes  ☒ no
Section II – Financial Statement Findings

Our audit did not disclose any matters required to be reported in accordance with Government Auditing Standards.

Section III – Findings and Questioned Costs – Major Federal Programs

2016 – 001

Federal agency: Department of Education
Federal program title: Student Financial Assistance Cluster
CFDA Number: Federal Pell Grant Program – 84.063
Award Period: July 1, 2015 to June 30, 2016
Type of Finding:
- Compliance, Other Matter
- Significant Deficiency in Internal Control over Compliance

Criteria or specific requirement: The Code of Federal Regulations, 34 CFR 690, states that the University is required to report the disbursement dates and amounts to the Common Origination and Disbursement (COD) system within 15 days of disbursing Federal Pell Grant funds to students.

Condition: During our testing, we noted that for three of the 40 students tested, disbursements were not reported within the required 15 days to the COD.

Questioned costs: None.

Context: Out of a sample of 40 students selected for testing for the requirement noted above, we noted three exceptions as described above.

Cause: Per discussion with Brian Hultgren, Associate Director of Financial Aid, in the beginning part of the aid year, Federal Pell Grant extractions were run manually by the University’s Pell Grant coordinator and Enrollment Management Information Technology (EMIT) tech consultant. The Office of Financial Aid found that the Pell extraction job was last run on June 23, 2015, and a request to schedule the job through the University’s automated client was to occur between July 1 and July 5, 2015. The reason for this gap was that the Pell Grant coordinator was on vacation and the EMIT tech consultant was absent due to illness.

These unforeseen events were the cause for some Pell Grant records to be reported outside of the 15-day window because the extraction jobs did not run for a short period of time.

Effect: Noncompliance with Federal regulations noted above. In addition, insufficient or incomplete Pell information at the COD may allow students to exceed their lifetime limits of eligible awards.

Repeat Finding: No.
Recommendation: We recommend the University evaluate its procedures and policies around reporting Pell disbursements to COD to ensure that student information is reported accurately and timely.

Views of responsible officials: There is no disagreement with the audit finding. The University will work to improve communication and written documentation within the Office of Financial Aid as well as with other offices, such as Enterprise Computing Services (ECS) and EMIT. The Office of Financial Aid will put measures in place to create, track and maintain the timeliness of Pell Grant disbursement records to COD by way of creating a systems calendar to track when to build, schedule or implement the extraction process through its client; cross-training to pre-plan for any unforeseen absences; and by creating policies and procedures focused on the scheduling and running of the Pell extraction process within the University’s automated client.

2016-002

Federal agency: Department of Education

Federal program title: Student Financial Assistance Cluster

CFDA Number: 84.007 – Federal Supplemental Education Opportunity Grants
84.033 – Federal Work Study Program
84.038 – Federal Perkins Loans
84.063 – Federal Pell Grant Program
84.268 – Federal Direct Student Loans
84.379 – Teacher Education Assistance for College and Higher Education Grants
84.408 – Postsecondary Education Assistance Scholarships for Veteran’s Dependents

Award Period: July 1, 2015 to June 30, 2016

Type of Finding:

- Compliance, Other Matter
- Significant Deficiency in Internal Control over Compliance

Criteria or specific requirement: The Code of Federal Regulations, 34 CFR 685.309, requires that enrollment status changes for students be reported to the National Student Loan Database System (NSLDS) within 15 days or within 60 days if the student with the status change will be reported on a scheduled transmission within 60 days of the change in status. Regulations require the status include an accurate effective date. In addition, regulations require that an institution make necessary corrections and return the records within 10 days for any roster files that do not pass the NSLDS enrollment reporting edits.

Uniform Guidance requires nonfederal entities receiving Federal awards establish and maintain internal controls designed to reasonably ensure compliance with Federal laws regulations, and program compliance requirements. Effective internal controls should include procedures to ensure that submission errors to the NSLDS are corrected and resubmitted in a timely manner.

Condition: Review of enrollment reporting data from the University showed that errors were not corrected and returned to NSLDS within the prescribed timeframe (10 days), and, per a sample of 40 students whose underlying enrollment reporting data was tested for accuracy of status and timeliness of reporting, one student's status was not reported to the NSLDS within the 60-day window described above.

Questioned costs: None.
Context: During our review of submission dates and error corrections, we noted that errors identified by the NSLDS were not corrected within the prescribed 10-day timeframe. In addition, during testing of underlying enrollment information, we noted one student, in a sample of 40, whose enrollment status was not reported to the NSLDS within the prescribed 60-day timeframe.

Cause: The University utilizes the National Student Clearinghouse (NSC) to report student information to NSLDS. After uploading batch roster updates to NSLDS within the required timeframe, the University’s error/acknowledgment file from NSLDS is available to them via their NSC services. In an attempt to correct the errors, NSC resubmitted the files within the required 10 days but unfortunately, some of those records continued to not pass the NSLDS enrollment reporting edits and we noted no additional uploads by NSC to correct these errors until the next enrollment roster request from NSLDS. The University also believes that the issues encountered and described above are also the cause of the discrepancies noted in the testing of underlying information.

Effect: The NSLDS system is not updated with the correct student information, which can cause overawarding should the student transfer to another University. In addition, the students may not properly enter the repayment period if their status is not properly updated with the NSLDS.

Repeat Finding: Yes, prior year finding 2015-003.

Recommendation: We recommend the University continue to review its reporting procedures to ensure that students’ statuses are accurately and timely reported to NSLDS as required by regulations described above.

Views of responsible officials: There is no disagreement with the audit finding; however, in the past eight months, the Office of the Registrar has taken the following actions to respond to attempt to improve the reporting relationship between the National Student Clearinghouse and the NSLDS, including: Speaking directly with the CEO of the National Student Clearinghouse about the errors they have sent to NSLDS; contacting the NSC Audit Services Division about the errors; engaging in troubleshooting conversations with other peer institutions about how to positively impact this situation; reviewing the submission timeframe in an effort to better align with the NSC submission timeframe to the NSLDS; and creating a review team in the Office of the Registrar to evaluate the submissions after realigning with the NSC submission to the NSLDS. Two of the above actions were recommendations from another University that was able to improve their submissions successfully.
OREGON STATE UNIVERSITY
SUMMARY SCHEDULE OF PRIOR YEAR FINDINGS
FOR THE YEAR ENDED JUNE 30, 2016

Section IV – Prior Year Findings

2015-001

Federal agency: Department of Education
Federal program title: Student Financial Assistance Cluster
CFDA Number: 84.007 – Federal Supplemental Education Opportunity Grants
84.033 – Federal Work Study Program
84.038 – Federal Perkins Loans
84.063 – Federal Pell Grant Program
84.268 – Federal Direct Student Loans
84.379 – Teacher Education Assistance for College and Higher Education Grants
84.408 – Postsecondary Education Scholarships for Veteran’s Dependents

Type of Finding:
• Compliance, Other Matter
• Significant Deficiency in Internal Control over Compliance

Summary: Per 34 CFR section 668, and as outlined in the former OMB A-133 Compliance Supplement, Part 5, the institution must submit data corrections for verified students to the central processor. In addition, as outlined in the Federal Student Aid Handbook, any errors reported on the original Free Application for Federal Student Aid (FAFSA), must be corrected and submitted for processing should those corrections change the student’s Estimated Family Contribution (EFC). Out of 40 students tested for this requirement, one student was noted to have conflicting data between the University’s information system and the information maintained with the central processor.

Status: During the current year’s testing surrounding FAFSA information and comparison to University information, no exceptions were noted in a sample of 40 students selected for testing.

2015-002

Federal agency: Department of Education
Federal program title: Student Financial Assistance Cluster
CFDA Number: 84.007 – Federal Supplemental Education Opportunity Grants
84.033 – Federal Work Study Program
84.038 – Federal Perkins Loans
84.063 – Federal Pell Grant Program
84.268 – Federal Direct Student Loans
84.379 – Teacher Education Assistance for College and Higher Education Grants
84.408 – Postsecondary Education Scholarships for Veteran’s Dependents

Type of Finding:
• Significant Deficiency in Internal Control over Compliance
Summary: Per former OMB Circular A-110, nonfederal entities receiving Federal awards are required to establish and maintain internal controls designed to reasonably ensure compliance with Federal laws, regulations and program compliance requirements. During our testing of the verification requirement, we did not find any noncompliance. However, we were unable to identify a specific control in place to ensure that any errors would be prevented or detected in a timely matter.

Status: During the current year’s audit and testing of the controls surrounding the Federal student aid verification process, we determined and reviewed the control processes put in place during the current year. No similar findings were noted during the current year audit.

2015-003
Repeated. See current year finding 2016-002.

2015-004
Federal agency: Department of Agriculture
Federal program title: Research and Development Cluster
Program Title: Water Availability in Western Oregon Headwaters: Effects of Density Management and Riparian Buffers
CFDA Number: 10.000
Type of Finding:
• Significant Deficiency in Internal Control over Compliance

Summary: Per former OMB Circular A-110, nonfederal entities receiving Federal awards are required to establish and maintain internal controls designed to reasonably ensure compliance with Federal laws, regulations and program compliance requirements. Per review of supporting documentation for 40 Federal expenditures selected for testing, one invoice in excess of $1,000 was approved by an individual who did not have the authority to authorize invoices in excess of $1,000.

Status: Per discussions with University management and departmental leadership and testing performed over disbursements, it was determined that the corrective action plan identified in the prior year pertaining to payment approval authority of invoices for expenditures related to Federal funds was implemented during the current year. During the current year audit, such expenditures were subject to and selected for testing of the control processes noted above, for which there was a significant deficiency in internal control over compliance in the prior year. No such exceptions were noted during our current year audit.
