**College of Engineering Proposal to increase Differential Tuition for
Online M.S. Radiation Health Physics
1/7/20**

College of Engineering's (COE) Radiation Health Physics (RHP) online master's degree is a unique online degree which has seen an increase in students both in applications and degree completions. All of the online courses within the RHP program have been re-developed via Ecampus and new courses have been added to the program to ensure the students are receiving an exceptional educational experience which addresses industry standards. COE is requesting an increase in Fall 2020 tuition by 6% and then another 6% increase in Fall 2021. The Fall 2019 tuition is \$615/SCH, which would make Fall 2020 \$652/SCH, and Fall 2021 \$691/SCH. The staggered increase is to allow students to budget for the tuition increase and if possible, complete the program prior to the tuition increase beginning in Fall 2020.

The RHP program is unique and offered online, and is priced much lower than the nearest topical online competitors, MS degrees in Nuclear Engineering (see attached table). The program has advanced the student's virtual experience with virtual labs which have been costly to create for the online student. This tuition increase will be communicated no later than the beginning of Spring 2020 term to current and prospective students via the microsite page on the Ecampus website. Email communications will be sent to all current and matriculated students within the program, and continued communication will occur via the director for the RHP program, the advisor and other RHP faculty and administrators. There will be no surprises for the incoming, current and matriculated students regarding the Fall 2020 tuition rates.

OSU College of Engineering	Campus	Residency	SCH	Cost/SCH	Qtr/Sem	Total Cost
